source model or
procedure

Marriage model (Section 3)

Finite equal-side communities with complete strict preferences

Definition (Section 3)

An unstable marriage has a mutually preferred unmatched pair

Theorem 1

A stable complete marriage exists

College-admissions model (Sections 3–4)

Quotas, strict preferences, and the applicant-proposing procedure

Definition (page 10)

Unstable college assignment

Definition (page 10)

Applicant-optimal stable assignment

Theorem 2

The Section 4 assignment is applicant-optimal among stable assignments
